

RISC-V Taiwan Alliance (RVTA) Update

May, 2020

Taiwan Semiconductor Ecosystem

The background of the slide features a faded, grayscale image of a city skyline with various skyscrapers. A large, solid blue arrow points from the left side of the slide towards the right, partially overlapping the city image and the title text.

Highly Specialized Supply Chain

Foundry (Worldwide 70% market share) and OSAT worldwide 50% are both world leading, and IC design 20% next only to the U.S., with extensive IP and design services.

While RVTA gathers industry and academia expertise, momentum of RISC-V is building up primarily by business and research opportunities.

Examples of RISC-V announcements

RISC-V Taiwan Alliance (RVTA)

Foundry

TSMC Open Innovation Platform (OIP) in collaboration with SiFive.

IP

Andes Launches RISC-V FreeStart Program with its Commercial-Grade CPU N22.

Design service

Faraday Unveils RISC-V ASIC Solution to Support Edge AI and IOT SoCs, proven in mass production.

Highlight: Processing in Memory*

Powerchip forms AI Memory Corp. for solutions to the memory wall in computing.

Processing in Memory*

Unprecedented scalable
ultra-efficient PIM*
architecture and chip

Boosting **20x** data
intensive applications

4 Gb DRAM memory
chips, embedding
8 processors on die

Power efficiency **10x**
better

Delivered as standard
DDR4 2400 DIMM
modules with 16 chips

UPMEM 2019 Paper*

By reducing drastically
CPU-DRAM data
movement

Server CPU helped by
thousands of additional
cores

At marginal cost

Andes V5 Adoption

- ADAS
- AIoT at the edge
- Block chain
- Communication: BT, WiFi, 5G
- Datacenter AI accelerator
- SSD: enterprise/consumer
- Security
- FPGA
- MCU
- Multimedia: A/V, AR/VR

40nm to 7nm

GNU Toolchains

RISC-V LLVM Porting Effort

- Alex Bradbury is in charge of RISC-V LLVM
 - Talk yesterday afternoon
 - Poster on Tuesday night
- RV32IM[A]FD support upstream
 - Missing hard-float calling convention
 - Missing 64-bit support
 - Missing compressed support
- Clang, Go, and OpenJDK have run code
 - Rust port in progress
 - Poster on Tuesday

RISC-V Taiwan Alliance

- Established on March 7th, 2019
- Initiated by Taiwan IOT industry association

RISC-V TAIWAN Alliance (RVTA) is committed to coordinating industry, academic, and research institute to work together and introduce RISC-V open architecture to Taiwan.

As soon as we connect resources from RISC-V ecosystems worldwide, Taiwan's R&D, design and application will be capable of integrating AIOT and hitchhiking 5G trends and business opportunities, improving Taiwan's industrial competitiveness.

Mission

RISC-V Taiwan Alliance (RVTA)

Market

Support Taiwan's semiconductor business to enter the core customization of IC design and expedite the RISC-V open architecture into commercial market.

Technology

Promote RISC-V technology and accelerate the development of AIoT and edge computing industry in Taiwan.

Talents

Cultivate talents, and connect resources from RISC-V ecosystems worldwide, making Taiwan's ICT industry a key player in the global supply chain and core AIoT solution provider.

What we have achieved

- Mar 7th , 2019
RVTA was established
- May 22nd , 2019
Chairman Wang visited MIIT in Beijing
- May 29th , 2019
RVTA hosted the RISC-V forum at COMPUTEX TAIPEI
- Jul 30th & Sep 17th ,2019
RVTA co-hosted cross-strait standards forum in RISC-V section

Concluding Remarks

RISC-V Taiwan Alliance (RVTA)

Community is a great force to advance technologies.

But, you must be able to work with it and tolerate its pace.
